> Experience

> [Suika Labs](#)

 JAN 2021 – Present

Sole Proprietor. Tech lead and Solidity Smart Contract Developer and Auditor

Projects

- ▶ **Powercity (Pulsechain)**: NFT minting ERC-721 platform, batch/lazy minting capabilities, post-reveal functionality, and subscription-based asset hosting with IPFS integration using a custom Oracle development.
- ▶ **CMTY Protocol (Pulsechain)**: ERC-4626 vault security, on-chain yield distribution, and dynamic ERC-1155 NFT architecture for RWA.
- ▶ **LocalDeFi (Ethereum)**: P2P marketplace with escrow, Chainlink Oracle, and reputation systems for LocalDeFi's no-KYC trading platform to exchange ERC20 and NFT token packages.
- ▶ **Shark Protocol (Arbitrum)**: collateral Loans, Chainlink Oracle integration on Arbitrum based on the custom USDS token, featuring risk-isolated vaults, automated liquidations.
- ▶ **Web3Worx (BSC Chain)**: a customized Crowdsale Smart Contract for Web3Workx's \$WRKX token pre-sale, featuring whitelist, multi-token contribution options, adjustable time windows, batch token distribution, and optional automatic staking integration.

> [WPSmartContracts.com](#) Smart Contracts Developer and Auditor
